Our vision

“We have grown to be a leader in our field because we build and nurture strong client relationships, we rise to any challenge and we value innovation and resourcefulness”

We are big enough to do any job and small enough to be responsive!

1. About Us

SBW Holdings (Pty) Ltd is a Black Economic Empowerment (BEE) company involved with a wide range of repetitive steel fabrication, plant maintenance and a diversity of mechanical tasks that change on a daily basis as per requirements of its major tasks. We pride ourselves on the knowledge, skills and expertise of our employees who work together as a team delivering successful projects. Valuing the importance of relationships, we have a collaborative approach that is flexible and can respond quickly to the needs of our clients. We specialize in the fabrication, refurbishment and repair of pressure vessels, heat exchangers, boilers, economizers, tanks, silos, pressurized systems, ducting, general structural steel work and machining. We pride ourselves in our integrated team with the capacity to execute erection contract and site maintenance. We have sufficient capacity to handle small to large projects and are religiously committed to all stakeholders in living our values, mission and vision. Working with industries as diverse as automotive, power plant, earth moving, telecommunications, our company has established a strong foothold in the market due to our consistent quality and timely services along with the enthusiasm of our technically qualified staff.

2. Mission | Vision | Objectives | Values

Mission

To grow our market through first class quality service provision by gainful BEE solution partnership thereby creating jobs and developing work-ready skills, nationally and regionally through our professional team and superior processes in a quality driven, honest and reliable business environment in order to exceed the expectations of our client base, thus fostering long-term working relationships.

Vision

- To be a preferred provider of Specialized Engineering Services in Steel Fabrication & Plant Maintenance and quality spares to the small and large organizations in the Public and Private Sectors in and around South Africa, and in the process make our contribution to the economy by creating jobs and skills development.
- To establish long-term relationships with our clients, built on trust, while focusing on enhancing productivity, increasing efficiency and boosting profitability.

Objective

Our objectives are to:

- Deliver services on time, in budget and to the requested quality standards.
- Establish long-term relationship with the client.
- Implement an effective quality assurance system.
- Comply with all Safety Acts and Regulations.

Values

Our values are:

- Integrity
- Commitment
- Excellence
- Accountability
- Respect
- Care

We are big enough to do any job and small enough to be responsive!

3. Services

Customer Service

SBW Holdings tailors its services to each client to ensure timely, effective response to their needs. We are strongly committed to safe and responsible project management, working diligently to ensure regulatory compliance and protecting the public's health and natural resources.

Fabrication, Construction and Erection

SBW's commitment to its customers begins with a vast background in fabrication, construction and erection. The emphasis in the fabrication and construction business is commercial and industrial construction. SBW does all steel construction in a safe and cost-effective manner.

Engineering Design

SBW is equipped to do a variety of engineering design work, including

- Equipment specifications, design, selection and inspection
- Computer based mechanical, structural, civil, electrical, control and instrumentation design, including 3D modeling.
- Fabrication and specialized welding of pipes and components
- Plant maintenance

4. Safety | Health and Environment

Safety

"OUR TARGET IS ZERO HARM"

- SBW complies with the Occupational Health and Safety Act as well as the Mine Health Safety Act in all company regulations. Our safety plan and policy are aimed at creating a safe environment for all our employees and the community.
- Adopting a zero defect philosophy and striving for zero accidents through proper training, work practices, risk management and adherence to safety regulations at all times.

Health and Environment

Management is committed to an active Health and Environmental Management System and will continue to provide leadership, support and the means to maintain the highest standards.

Our Safety, Health and Environmental Management System are aimed at eliminating:

- Personal injuries
- Occupational health hazards
- Fires and explosions
- Security risk to company assets
- Risk to people, equipment, materials and the environment

Capabilities and Past Projects

Over the years, SBW has been involved in numerous construction and engineering projects with clients such as:

We are big enough to do any job and small enough to be responsive!

Library

Power Plant Equipment

Pressure testing the heater bank

Checking SMAW (stick welding integrity on heater bank

We are big enough to do any job and small enough to be responsive!

Refurbishment of BI-DRUM SUPERHEATED SYTEAM VALVES

Repair, refurbishment, and maintenance of Bi-drum boilers with, super heater & economizer components such as valves, drought groups that is ID fans FD fans, ID fans, PA fans, air heater primary and secondary air heaters, soot blowers, chain grates, burners.

Lapping valve seat of super heater spray water regulating valves

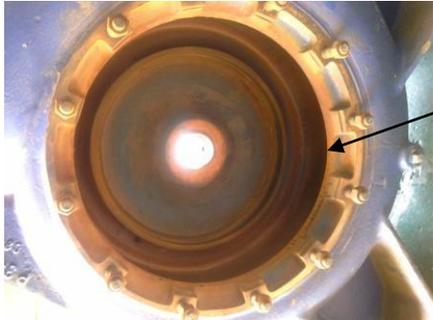

Repairing the spindle of super heater spray water valves

We are big enough to do any job and small enough to be responsive!

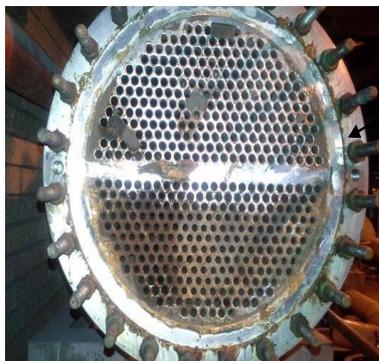

Overhaul of Pumps and Gear Box

Assembling of end suction pumps

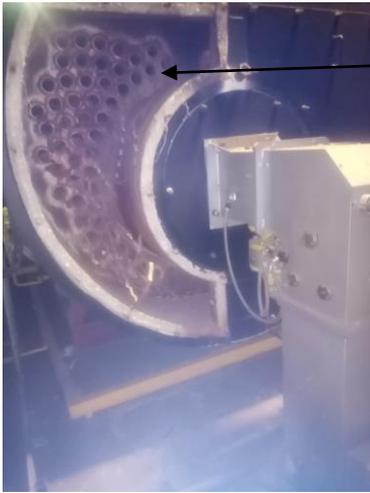

Assembly of double suction split casing pumps. Checking wearing and impeller clearances. Before final box up

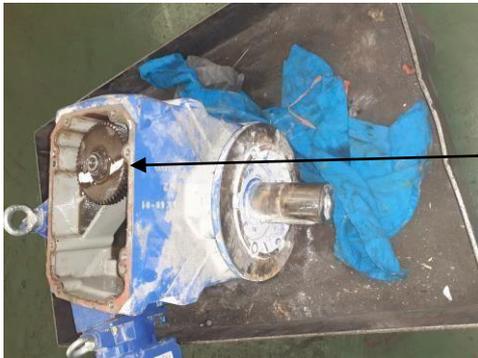

Repair and cleaning of heat

We are big enough to do any job and small enough to be responsive!

Repair of chain grate boilers and pressure testing

Cleaning of tubes for this gas boiler and repair of its auxiliaries such as FD and ID fans

This gearbox had a problem of not driving which due to welding on the pinion.

Repair of boiler
